Description

Designation: KBS708

Deposited Name: Deposited as *Terrasalsus kalamazoo*

Propagation

Medium

ATCC® Medium 2734: VL55

ATCC® Medium 2258: R2A medium

Growth Conditions

Temperature: 20°C to 37°C

Atmosphere: Microaerophilic / aerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Incubate the broth tubes at 37°C with gentle shaking for 3 to 6 days. Incubate the slants at room temperature under microaerophilic conditions.
3. Using a single tube of VL55 or R2A broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
4. Aseptically transfer this aliquot back into the broth tube. Mix well.
5. Use several drops of the suspension to inoculate additional broths and slants.

Notes

This organism can grow either aerobically or under microaerophilic conditions. The depositor state the best growth on agar is obtained under microaerophilic conditions. In broth, the best growth was obtained at 37°C with gentle shaking. If this culture is incubated under static conditions, the cells appear as irregular shaped rods that occur singly or in pairs. If incubated in broth with shaking, the cells tend to form a mass which is light pink in color and settles to the bottom of the tube or flask. No motility was detected.

Additional information on this culture is available on the ATCC® web site at www.atcc.org

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.
