

## Product Sheet

# CC118 lambda pir (pBAM1-GFP) (ATCC® BAA-2426™)

## Escherichia coli

### Please read this FIRST

Storage Temp.  
**Store unopened freeze dried vial at 4°C**

---

Biosafety Level  
**1**

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Escherichia coli* (ATCC® BAA-2426™)

### Shipping Information

Freeze dried *E. coli* containing the plasmid

## Description

This clone contains a promoter-less and leaderless gfp in the multiple cloning site of pBam1, ATCC® BAA-2425™, an all-synthetic mini-transposon vector encoding the natural bacterial transposon Tn5, designed for genetic manipulations in the genome of Gram-negative bacteria.

**Total size of construct (kp):** 5.023

**Designation:** CC118 lambda pir (pBAM1-GFP)

## Insert Information

**Insert size (kb):** 0.710

**Gene:** gfp

**DNA:** cDNA

**Genbank accession:** HQ908072

## Vector Information

**Vector:** pBam1

**Markers:** ampR, kanR

**Vector type:** plasmid

**Vector size (kb):** 4.384

**Genbank accession:** HQ908071

**Features:**

**Transposase Promoter:** T1

**Kanamycin Resistance Promoter:** neo

**Beta-lactamase Promoter:** P3

**Beta-lactamase Terminator:** trpA (up-stream), gene VIII from phage fd (down-stream)

**Replicon:** R6K

## Propagation

1. Open vial according to instructions.
2. Aseptically add 0.3 to 0.4 mL of liquid medium to the freeze-dried pellet and mix well. Transfer 100 µL to a test tube containing 5 mL LB + kanamycin (25 µg/mL) + ampicillin (50 µg/mL). A loopful of culture can also be streaked on an agar plate of the same. Incubate cultures at 37°C.
3. Isolate DNA using standard plasmid preparation procedures.

### Growth Conditions

**Temperature:** 37°C

**Atmosphere:** Aerobic

**Medium**

ATCC® Medium 1014: LB Agar/Broth Medium w/AMP 50mcg/ml and KAN 25 mcg/ml

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
