

Product Sheet

Albidiferax ferrireducens (ATCC® BAA-621™)

Please read this FIRST

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Albidiferax ferrireducens* (ATCC® BAA-621™)

Description

Designation: T118 [DSM 15236]

Deposited Name: *Rhodoferax ferrireducens* Finneran et al.

Propagation

Medium

ATCC® Medium 2433: *Rhodoferax ferrireducens* medium

Growth Conditions

Temperature: 26.0°C

Atmosphere: facultative anaerobe

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Under anaerobic conditions, rehydrate the entire cell pellet with a small amount of #2433 broth. Transfer this aliquot back into the tube of broth.
3. Additional #2433 broth tubes can also be inoculated with 0.5 ml from the original broth.
4. Incubate at 26°C for 3-10 days.

ANAEROBIC CONDITIONS:

Anaerobic conditions for transfer may be obtained by either of the following:

- Use of an anaerobic gas chamber, or
- Placement of test tubes under a gassing cannula system hooked to anaerobic gas.

Anaerobic conditions for incubation may be obtained by any of the following:

- Loose screw caps on test tubes in anaerobic chamber,
- Loose screw caps on test tubes in an activated anaerobic gas pack jar, or
- Use of sterile butyl rubber stoppers on test tubes so that an anaerobic gas headspace is retained.

Notes

This culture grows best in broth. Cells are Gram-negative small, motile rods. It is a facultative anaerobe. This organism can utilize 20 to 40 mM nitrate as an electron acceptor replacing Fe-(NTA). Initial growth can take up to 2 weeks but transfers with 10% inoculums take 3 to 5 days.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.
