Description

Designation: GR-1
Deposited Name: Unidentified bacterium

Propagation

Medium

ATCC® Medium 3: Nutrient agar or nutrient broth

ATCC® Medium 2546: Mineral Medium pH 7.25

Growth Conditions

Temperature: 30°C

Atmosphere: Aerobic

Propagation Procedure

1. Open vial according to enclosed instructions.
2. Using a single tube of #3 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette. Rehydrate the entire pellet.
3. Aseptically transfer this aliquot back into the broth tube. Mix well.
4. Use several drops of the suspension to inoculate a #3 agar slants and/or plate.
5. Incubate the tubes and plate at 30°C for 48 to 96 hours.
6. When testing for the utilization of chlorate, it must be under anaerobic conditions.*

Substrate utilization:

1. Add the electron donor (final concentration of 10 mM) and acceptor (final concentration of 10 mM) to ATCC® Medium #2546.
2. Exchange gas in head space for 80% N₂-20% CO₂ or 100% N₂.
3. Reduce the medium with the addition of cysteine (0.1 mL per 10 mL of medium, stock concentration of 3%). Let the medium sit at room temperature for a minimum of 30 minutes.
4. Inoculate the medium with 0.5 mL of actively growing culture (use #3 broth culture).

Notes

Growth of this strain needs to be established in broth culture for 48 to 96 hours before transferring to agar slant tubes and agar plates. Growth may take a little longer than 96 hours to grow on agar plates.

May have to establish growth in broth before growth on agar is observed.

This strain can also grow on ATCC Medium #1955: VM medium.

Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
