

Product Sheet

Sulfurovum lithotrophicum (ATCC® BAA-797™)

Please read this FIRST

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Sulfurovum lithotrophicum* (ATCC® BAA-797™)

Description

Designation: 42BKT

Deposited Name: *Sulfurimicrosoma lithotrophicum*

Propagation

Medium

ATCC® Medium 2690: MJ Base and Sea Water Medium, BAA-797

Growth Conditions

Temperature: 26-30°C

Atmosphere: Anaerobic or microaerophilic

Propagation Procedure

1. Prepare tubes to be inoculated by exchanging the gas in the head space for fresh N₂-CO₂. Growth occurs chemolithoautotrophically with elemental sulfur or thiosulfate as an electron donor and with oxygen or nitrate as an electron acceptor and using CO₂ as the carbon source. The optimum concentration of oxygen is 5%. When grown anaerobically the culture is stimulated by the addition of sodium sulfide (0.05% final concentration). The medium does not need to be pre-reduced before inoculation.
2. Open vial according to enclosed instructions.
3. Using a single tube of #2690 broth (5 to 6 ml), withdraw approximately 0.5 to 1.0 ml with a Pasteur or 1.0 ml pipette. Rehydrate the entire pellet.
4. Aseptically transfer this aliquot back into the broth tube. Mix well.
5. Use several drops of the suspension to inoculate additional tubes of broth, agar slants and/or plates.
6. Incubate the tubes and plates at 26-30°C for 2-3 days under anaerobic or microaerophilic conditions.

Notes

Within 2 to 3 days growth should be evident by turbidity in the broth tube(s). Additional information on this culture is available on the ATCC® web site at www.atcc.org.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.
