

Nucleic Acid Product Sheet

Human genomic DNA (HCC1395 BL) (ATCC® CRL-2325D™)

Please read this FIRST

Storage Temp.
-20°C or colder in a manual defrost freezer. Avoid freeze-thawing.

Biosafety Level
2

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human genomic DNA (HCC1395 BL) (ATCC® CRL-2325D™)

Description

Source: *Homo sapiens*

Designation: Human genomic DNA (HCC1395 BL)

Description: Human genomic DNA (HCC1395 BL)

Note:

HCC1395 BL is a B lymphoblastoid cell line initiated by Epstein-Barr virus (EBV)-transformation of peripheral blood lymphocytes obtained from the same patient as the breast carcinoma cell line HCC1395. The cell line was initiated from a 43 year- old White female with a TNM stage I, grade 3 primary ductal carcinoma and a prior history of cancer; her mother had breast cancer. The DNA isolated from HCC1395 is available as CRL-2324D.

The DNA is available with the following restrictions:

1. The CRL-2325 cell line was deposited at the ATCC by Dr. Adi F. Gazdar and is provided for research purposes only. Neither the cell line nor DNA products derived from it may be sold or used for commercial purposes. Nor can the cells nor the DNA be distributed to third parties for purposes of sale, or producing for sale, cells or their products. The cells and DNA are provided as service to the research community. They are provided without warranty of merchantability or fitness for a particular purpose or any other warranty, expressed or implied.
2. Any proposed commercial use of the cells, DNA or their products must first be negotiated with the University of Texas Southwestern Medical Center at Dallas, 5323 Harry Hines Blvd., Dallas, Texas 75235. Telephone (214) 648-1888, Email TechnologyDevelopment@UTSouthwestern.edu, or Fax: (214) 951-0935.

Gazdar AF, et al. Characterization of paired tumor and non-tumor cell lines established from patients with breast cancer. *Int. J. Cancer* 78: 766-774, 1998. PubMed: [9833771](https://pubmed.ncbi.nlm.nih.gov/9833771/)

Formulation: 1X TE buffer (10 mM Tris-HCL, 1 mM EDTA, pH 8.0)

Concentration: See lot-specific information

Lot Number: See lot-specific information

Cell line description: See lot-specific information

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Quality Control Information

> 100 kb in size by agarose gel electrophoresis

No RNA detected in the agarose gel

A_{260}/A_{280} > ratio 1.8

Tested and verified for PCR amplification and restriction digestion.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product
