**Description**

**Designation:** Boston 41501  
**Deposited Name:** Pseudomonas aeruginosa (Schroeter) Migula

**Propagation**

**Medium**  
ATCC® Medium 18: Trypticase Soy Agar/Broth

**Growth Conditions**

**Temperature:** 37°C  
**Atmosphere:** Aerobic

**Propagation Procedure**

1. Open vial according to enclosed instructions.  
2. From a single tube of #18 broth (5 to 6 mL), withdraw approximately 0.5 to 1.0 mL with a Pasteur or 1.0 mL pipette and use to rehydrate the entire pellet.  
3. Transfer the rehydrated pellet back into the broth tube. Mix well.  
4. Use several drops of the suspension to inoculate a second tube of broth, a slant, and/or a plate.  
5. Incubate all tubes and plates at 37°C for 24 hours.

**Notes**

Certificates of Analysis are available electronically at [www.atcc.org](http://www.atcc.org), or by hardcopy upon request. Two colony types may be observed. They have been individually characterized and found to be the same. The predominant type is flat with a spreading edge and rough surface. The secondary type is small and compact. To prevent the proliferation of the second colony type, avoid passing this strain through broth for subsequent transfers. It is recommended to wash the slant with phosphate buffer and use that to inoculate further agar plates and/or agar flasks, if needed. This strain produces both fluorescein and pyocyanin pigments. Additional information on this culture is available on the ATCC website at www.atcc.org.

**Biosafety Level:** 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

**ATCC Warranty**

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

**Disclaimers**

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate. This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort
Product Sheet

**Pseudomonas aeruginosa (ATCC® CRM-27853™)**

Please read this FIRST

**Storage Temp.**

2°C to 8°C, low humidity, for freeze-dried cultures

**Biosafety Level**

2

**Intended Use**

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

**Citation of Strain**

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: *Pseudomonas aeruginosa (ATCC® CRM-27853™)*
