

## Product Sheet

# pTR-UF-11 plasmid in *E. coli* (ATCC® MBA-331™)

### Please read this FIRST

---

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: pTR-UF-11 plasmid in *E. coli* (ATCC® MBA-331™)

### Description

Small cuts in both AAV ITRs (these can be unstable in bacteria). When culturing the bacteria containing AAV ITRs, do not culture for more than 16-18 hours at 37°C because deletions may occur especially in stationary cultures. A missing ITR can be tolerated in about 20% of a plasmid prep. Small cuts in both AAV ITRs and can serve as a diagnostic that the ITRs are intact. One or the other ITRs may be deleted (and so will the SmaI site) during culturing and cloning. If an ITR is deleted, then the SmaI digests will generate larger molecular weight bands.

**Designation:** pTR-UF-11 plasmid in *E. coli*

**Distribution Host:** *E. coli* SURE Cells from Stratagene

### Propagation

Streak a loopful of culture on an LB + 50 µg/mL ampicillin agar plate. Incubate liquid cultures at 37°C for no more than 16-18 hours. Isolate DNA using standard plasmid preparation procedures. Up to 20% of the plasmid population with one ITR deleted is tolerated

### Growth Conditions

**Temperature:** 37°C

### Propagation:

Streak a loopful of culture on an LB + 50 µg/mL ampicillin agar plate. Incubate liquid cultures at 37°C for no more than 16-18 hours. Isolate DNA using standard plasmid preparation procedures. Up to 20% of the plasmid population with one ITR deleted is tolerated

### Medium

ATCC® Medium 1227: LB Medium (ATCC medium 1065) with 50 mcg/ml ampicillin

### Vector Information

**Vector size (in kb):** 7.2

**Vector type:** AAV vector plasmid

**Vector features:** CMV IE enhancer, Chicken β-actin promoter, AAV2 Inverted Terminal Repeats (ITRs), SV40 polyA, bovine growth hormone polyA

**Bacterial selection:** Ampicillin

### References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

### Notes

Restriction digests on the vector gave the following results (in Kb): PstI- 2.8, 1.9, 1.2, 1.0, 0.2, SmaI- 4.2, 3.0, faint band at 7.2 (indicates deletion of one ITR), NotI- 6.5, 0.7  
--ATCC staff

### Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

### Disclaimers

Product Sheet

**pTR-UF-11 plasmid in *E. coli*
