**Cladophialophora boppii**  
**(ATCC® MYA-4778™)**

**Please read this FIRST**

**Storage Temp.**  
**Frozen:** -80°C or colder  
**Freeze-Dried:** 2°C to 8°C

**Live Culture:** See Propagation Section

**Biosafety Level**  
2

---

**Intended Use**

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

**Citation of Strain**

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Cladophialophora boppii  (ATCC® MYA-4778™)

---

**Description**

**Strain Designation:** 524109 [CBS 127448]  
**Product Description:** An ampoule containing viable cells (yeast cells, spores, or agar cubes with mycelia) suspended in cryoprotectant.

---

**Propagation**

The information recommended in this section is to assist users in obtaining living culture(s) for their studies. The recommendation does not imply that the conditions or procedures provided below are optimum. Experienced researchers may initiate the growth of a culture in their own way.

**ATCC® Medium 28:** Emmons’ modification of Sabouraud’s agar  
**ATCC® Medium 336:** Potato dextrose agar (PDA)

---

**Growth Conditions**

**Temperature:** 20°C to 25°C  
**Atmosphere:** Typical aerobic

---

**Recommended Procedure**

Frozen ampoules packed in dry ice should either be thawed immediately or stored in liquid nitrogen. If liquid nitrogen storage facilities are not available, frozen ampoules may be stored at or below -70°C for approximately one week. Do not under any circumstance store frozen ampoules at refrigerator freezer temperatures (generally -20°C). Storage of frozen material at this temperature will result in the death of the culture.

1. To thaw a frozen ampoule, place in a 25°C to 30°C water bath, until just thawed (approximately 5 minutes). Immerse the ampoule just sufficient to cover the frozen material. Do not agitate the ampoule.
2. Immediately after thawing, wipe down ampoule with 70% ethanol and aseptically transfer at least 50 µL (or 2 to 3 agar cubes) of the content onto a plate or broth with medium recommended.
3. Incubate the inoculum/strain at the temperature and conditions recommended.
4. Inspect for growth of the inoculum/strain regularly. The sign of viability is noticeable typically after 3-5 days of incubation. However, the time necessary for significant growth will vary from strain to strain.

---

**Colony and Cell Morphology:** On PDA after 40 days at 25°C, colonies olive brown to dark brown, dense thick mycelium, velutinous. Hyphae dematiaceous, thick walled, and irregularly bent. Conidia subglobose to ellipsoid, smooth, tan to brown, 3-9 µm x 3-5.25 µm. Conidia observed both single and in chains.

---

**Notes**

Clinical isolate.  
Additional, updated information on this product may be available on the ATCC® web site at www.atcc.org.

---

**DNA Sequence**

18S ribosomal RNA gene, partial sequence; internal transcribed spacer 1, 5.8S ribosomal RNA gene, and internal transcribed spacer 2, complete sequence; and 28S ribosomal RNA gene, partial sequence.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

ATCC® products are warranted for 30 days from the date of shipment, and this warranty is valid only if the product is stored and handled according to the information included on this product information sheet. If the ATCC® product is a living cell or microorganism, ATCC lists the media formulation that has been found to be effective for this product. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this product. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Cladophialophora boppii (ATCC® MYA-4778™)
