## Description

**Product Description:** This medium is the recommended formulation for the axenic cultivation of *Giardia* and *Spironucleus*. It is provided freeze-dried, complete with 10% bovine serum, 1 vial prepares 15 mL of medium.

## Directions for Use

1. Alcohol the crimped aluminum cap and remove it.
2. Alcohol the rubber stopper and allow to dry.
3. Aseptically remove the rubber stopper and aseptically add 15 mL of double glass distilled sterile water. Swirl to completely dissolve the freeze-dried medium.
4. Aseptically distribute 13 mL of the rehydrated medium to a sterile 16 x 125 mm screw-capped test tube.
5. Screw the cap on tightly and store at 2-8°C until ready to use. Use within 4 days.
6. When ready to use, equilibrate the tube at the appropriate growth temperature before inoculation with the protist.
7. Follow standard procedure for maintaining culture as specified in the product sheet for that protist.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
