

Product Sheet

# Canarypox virus (ATCC® VR-111™)

Please read this **FIRST**

---

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Canarypox virus (ATCC® VR-111™)

American Type Culture Collection

## Description

**Strain:** Wheatley C93 [102]  
**Classification:** Poxviridae, Chordopoxvirinae, Avipoxvirus  
**Original Source:**  
Scab on foot of canary, New Jersey, 1948  
**Depositor:** SB Hitchner

## Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

## Propagation

**Propagation Host:**  
chicken embryo, chorioallantoic membrane inoculation  
**Host of Choice:** CE (CAM)  
**Host Range:** CE, C  
chicken embryo; chicken  
**Effect on Host:**  
Yes, in vivo effects: causes lesions on chorioallantoic membrane  
Pock lesions on CAM (not distinct)

## Growth Conditions

Duration: 3 days at 35C in chicken embryos

## Comments

Purchase requires a USDA permit. Pox lesions on the infected CAMs are not distinct and occur near inoculation site. Following cutaneous inoculation in canaries or passerine birds typical pox lesions develop on the skin. Diphtheritic lesions develop in the mouth subsequent to inoculation on the oral mucosa. Infection by either route of inoculation usually is fatal. Inoculation of the virus i.m. produces respiratory disease and death usually supervenes before cutaneous or diphtheritic lesions appear. This strain does not immunize against pigeon, fowl or turkey pox.  
Original Preparation Contributed By: S. B. Hitchner

## Key Abbreviations

(define all abbreviations used on master product sheet and batch product sheet)

C, chicken  
CAM, chorioallantoic membrane  
CE, chicken embryo  
CEID[50], mean infectious chicken embryo dose  
i.m., intramuscular  
PBS, phosphate-buffered saline  
SPF, specific pathogen free  
USDA, United States Department of Agriculture

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at [www.atcc.org](http://www.atcc.org)

Additional information on this culture is available on the ATCC web site at [www.atcc.org](http://www.atcc.org).
