

Product Sheet

# Tamiami virus (ATCC® VR-1273™)

Please read this **FIRST**

---

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Tamiami virus (ATCC® VR-1273™)

## Description

**Strain:** W-10777 [V-550-001-522]

**Classification:** Arenaviridae, Arenavirus, New World Arenaviruses

**Common Name:** Tamiami virus

**Original Source:**

Presumed from adult male *Sigmodon hispidus*, Florida, 1965

**Depositor:** NIH/NIAID

## Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

## Propagation

**Propagation Host:**

suckling mouse

**Recommended Host:** sM (i.c.)

suckling mouse, i.c. inoculation; Vero cells (ATCC CCL-81); LLC-MK2 cells (ATCC CCL-7)

**Effect on Host:**

Yes, in vivo effects: causes death in host animal  
death

## Comments

Labile at 56°C for 30 minutes, sensitive to sodium deoxycholate. HA not produced in goose, human O, guinea pig, sheep, mouse, and green monkey RBC at pH 5.9 to 7.2 at 4 to 37°C.

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Key Abbreviations

(define all abbreviations used on master product sheet and batch product sheet)

TCID<sub>50</sub> (TCID<sub>50</sub>), The Tissue Culture Infectious Dose

50% endpoint is the 50% infectious endpoint in cell culture. The TCID<sub>50</sub> is the dilution of virus that under the conditions of the assay can be expected to infect 50% of the culture vessels inoculated, just as a Lethal Dose 50% (LD<sub>50</sub>) is expected to kill half of the animals exposed. A reciprocal of the dilution required to yield the TCID<sub>50</sub> provides a measure of the titer (or infectivity) of a virus preparation.

sM, suckling mouse

i.c., intracerebral

LLC-MK<sub>2</sub>, rhesus monkey kidney cells

Vero, African green monkey kidney cells

HA, hemagglutination

RBC, red blood cells

## Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media
