Description

Strain: WSU 86-1044

Classification: Waddliaceae

Original Source:

pooled liver/lung homogenate from the aborted fetus of a 19-month-old primigravid Holstein cow during month 3 of gestation

Depositor: TF McElwain

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

bovine turbinate (BT) cells (ATCC CRL-1390)

BT cells (ATCC CRL-1390); P388D1 mouse macrophage cells (ATCC CCL-46)

Effect on Host:

Dense forms enter cytoplasm and reticulated forms develop, then change to dense forms and are released from the cell

Inclusions visualized by light microscopy as dense forms. Some cell death due to lysis. Cells become rounded and dense.

Growth Conditions

Incubation: 3 days at 35°C in BT cells (ATCC CRL-1390), 5% CO₂

Comments

Reference antisera against *Coxiella*, *Wolbachia*, *Chlamydia* and *Anaplasma* spp. And 14 members of the genus *Rickettsia* all failed to react significantly. Cross-reactivity was observed with *Cowdria ruminantium* (Kiswani isolate). Identification is recommended by 16S rRNA sequence—GenBank accession number AF042496. Dense forms enter cytoplasm and reticulated forms develop. These forms develop to dense forms that are released from the cell.

Key Abbreviations

(define all abbreviations used on master product sheet and batch specific product sheet)

TCID₅₀, 50% endpoint tissue culture infectious dose

BT cells, bovine turbinate cells

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
