

Product Sheet

Human rhinovirus 11 (ATCC® VR-1567™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human rhinovirus 11 (ATCC® VR-1567™)

Description

Strain: 1 [1-CV-15]

Classification: Picornaviridae, Rhinovirus, Human rhinovirus A

Original Source:

derived from existing strain

Depositor: ATCC, RM Conant, VV Hamparian

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

Recommended Host: H1- HeLa (ATCC CRL-1958)

Effect on Host:

Yes, in vitro effects: Cytopathic effects, refractile rounding and sloughing
CPE, refractile rounding and sloughing

Medium:

Virus growth medium: EMEM (ATCC 30-2003) and 2%FBS (ATCC 30-2020)

Growth Conditions

Atmosphere: 5% CO₂ in air recommended

Temperature: 33.0°C

Duration: 1 to 7 days on a rocker; For best results cells should be 24 to 48 hours old and 80-90% confluent (not 100% confluent).

Comments

Properties of virus similar to other picornaviruses, except unstable at pH 3.0-5.0, no hemagglutinins demonstrated, non-pathogenic for common laboratory animals. ATCC VR-1567 was derived by treating *Mycoplasma orale* contaminated ATCC VR-491 with solvent, 1,1,2-Trichlorotrifluoro-ethane (Sigma-Aldrich cat#270369).

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

AB, antibody
AS, antiserum
CO₂, (CO₂), carbon dioxide
CPE, cytopathic effect
CV, coryzavirus
EMEM, Eagles minimum essential medium
FA, fluorescent antibody
FBS, fetal bovine serum
FITC, fluorescein isothiocyanate
GP, guinea pig
H1-HeLa, human cervical adenocarcinoma cells
HD, human diploid cells
HEK, human embryo kidney
HeLa, human cervical adenocarcinoma cells
IgG, Immunoglobulin type G
MAB, monoclonal antibody
MkK, monkey kidney cells
MRC-5, human embryonic lung cells
Ms, mouse
mL, milliliter
pH, potential of hydrogen
TC, tissue culture

Product Sheet

Human rhinovirus 11 (ATCC® VR-1567™)

Please read this FIRST

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human rhinovirus 11 (ATCC® VR-1567™)

TCID₅₀(TCID[50]), The Tissue Culture Infectious Dose

50% endpoint is the 50% infectious endpoint in cell culture. The TCID₅₀ is the dilution of virus that under the conditions of the assay can be expected to infect 50% of the culture vessels inoculated, just as a Lethal Dose 50% (LD₅₀) is expected to kill half of the animals exposed. A reciprocal of the dilution required to yield the TCID₅₀ provides a measure of the titer (or infectivity) of a virus preparation.

WI, human embryonic lung cells

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org

Additional information on this culture is available on the ATCC web site at www.atcc.org.
