

Product Sheet

JC polyomavirus (ATCC® VR-1583™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: JC polyomavirus (ATCC® VR-1583™)

Description

Strain: MAD-4

Classification: *Polyomaviridae*, *Polyomavirus*

Original Source: Brain tumor of owl monkey

Depositor: EO Major, National Institute of Neurological Disorders and Stroke; ATCC®

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

COS-7 (ATCC® CRL-1651™)

Effect on Host:

No CPE, viral proteins detectable by antibody

Medium:

EMEM (ATCC® 30-2003™) + 2% FBS (ATCC® 30-2020™)

Growth Conditions

Temperature: 37°C

Recommendations for Infection: Plate cells 24-48 hours prior to infection and infect when cultures are 70-80% confluent. Freeze-thaw viral material 6 times prior to inoculation. Remove medium and inoculate with a small volume of virus (e.g. 1 mL per 25 cm²) diluted to provide an optimal MOI (e.g. 0.1). Adsorb 1-2 hours at 37°C in a humidified 5% CO₂ atmosphere, rocking every 20-30 minutes to redistribute inoculum. End adsorption by adding virus growth medium.

Incubation: 7 days

Comments

JC polyomavirus hemagglutinates human type O red blood cells (HA requires addition of 0.25% sodium deoxycholate).

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

°C (C), degree Celsius

bp, base pair

CO₂ (CO2), carbon dioxide

CPE, cytopathic effect

EMEM, Eagle's minimum essential medium

FBS, fetal bovine serum

HA, hemagglutinin

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium
