Description

Strain: Olson

Classification: *Picornaviridae*, *Enterovirus*, Enterovirus A

Original Source:

Stool of a 2-year-old child with nuchal rigidity and spasm of hamstring muscles, New York, 1948

Depositor: HA Wenner

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

human amnion cells

Host of Choice: HAm cells

Host Range: sM, HAm cells

suckling mouse; human amnion cells

Effect on Host:

Yes, in vitro effects: Cytopathic effects in tissue culture

CPE

Growth Conditions

Duration: 3-5 days

Comments

In secondary HAm cells, CPE appears in 3-5 days and consists of plaques containing rounded or dendritic cells with granular cytoplasm.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

CPE, cytopathic effect

HAm, human amnion

sM, suckling mouse

TC, tissue culture

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
