

Product Sheet

# Human rhinovirus 31 (ATCC® VR-1795™)

Please read this FIRST

---

## Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

## Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human rhinovirus 31 (ATCC® VR-1795™)

## Description

Strain: 140 F

Classification: *Picornaviridae*, *Rhinovirus*, Human rhinovirus A

Original Source: Human throat washings

Depositor: VV Hamparian and RM Conant

## Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

## Propagation

### Propagation Host:

HeLa (ATCC® CCL-2™)

### Effect on Host:

CPE, cell rounding and sloughing

### Medium:

EMEM (ATCC® 30-2003™) + 2% FBS (ATCC® 30-2020™)

### Growth Conditions

Temperature: 33°C

**Recommendations for Infection:** For best results, infection should be performed on a 80-90% confluent, 18-48 hour old cellular monolayer. Prepare dilution of virus in minimum amount of volume (e.g. 1 mL per 25 cm<sup>2</sup>), optimized for propagation (e.g. MOI 0.005 - 0.01 recommended). Wash monolayer with PBS or serum free medium prior to inoculation. Adsorb virus dilution for 1-2 hours at 33°C in a humidified 5% CO<sub>2</sub> atmosphere, while rocking. End adsorption by adding virus growth medium.

**Incubation:** 1-7 days at 33°C in a humidified 5% CO<sub>2</sub> atmosphere while rocking, until CPE is progressed through 80% of the monolayer.

## Comments

This item has been treated with diethyl ether to remove *Mycoplasma orale* at the ATCC. The previous item number was VR-506™

## References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

## Key Abbreviations

°C, degrees Celsius

CO<sub>2</sub> (CO2), carbon dioxide

CPE, cytopathic effect

EMEM, Eagle's minimum essential medium

FBS, Fetal bovine serum

MOI, multiplicity of infection

## Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium
