

Product Sheet

Canine parvovirus (ATCC® VR-2017™)

Please read this **FIRST**

Storage Temp.
-70°C or colder

Biosafety Level
2

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Canine parvovirus (ATCC® VR-2017™)

Description

Strain: Cornell-780916-80

Classification: *Parvoviridae*, *Parvovirus*, Feline panleukopenia virus

Original Source: Intestinal contents of beagle pups with severe enteritis

Depositor: Cornell Res. Fndn., Inc.

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

A-72 (ATCC® CRL-1542™)

Effect on Host:

CPE; refractile cell rounding and sloughing

Medium:

Virus growth medium: M-199 + 7.5% FBS (ATCC® 30-2020™)

Growth Conditions

Temperature: 37°C

Incubation: Incubate infected A-72 cell culture for 3-5 days at 37°C in 100% atmospheric air, until CPE is well advanced through 90% of the culture.

Recommendations for Infection: Plant cells 6 hours in advance and infect when cultures are 40-50% confluent. Remove medium and inoculate with a small volume (e.g. 1 mL per 25 cm²) of virus diluted with virus growth medium to provide a MOI of about 1.0. Adsorb 1 hour at 37°C in 100% atmospheric air in nonvented flasks. End adsorption by adding viral growth media.

Comments

Reconstitute freeze-dried vials to 1 mL with distilled water. Reduced virulence variant obtained by multiple passages at 33°C as per depositor. Virus agglutinates pig and rhesus monkey erythrocytes. NOTE: This material is cited in a U.S. and/or other patent applications and may not be used to infringe the patent claims.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
