Description

Strain: Brighton
Classification: Poxviridae, Orthopoxvirus
Original Source:
Lesions on hands of milker, England, 1937
Depositor: AW Downie

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:
rabbit, i. d. inoculation; primary rabbit kidney cells
Recommended Host: BS-C-1 (ATCC® CCL-26™)
rabbit; chicken embryo (chorioallantoic membrane); chicken embryo cells
Effect on Host:
Yes, in vivo effects: Localized hemorrhagic lesion at inoculation site

Medium:
Virus growth medium: Leibovitz's L-15 (ATCC® 30-2008™) + 2% FBS (ATCC® 30-2020™).

Growth Conditions

Duration: 2-3 days

Comments

This strain is recognized as prototype strain by Virus Subcommittee of the International Nomenclature Committee (Fenner A, Burnet, FM, 1957).

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
