

## Product Sheet

# H-1 parvovirus (ATCC® VR-356™)

### Please read this FIRST

---

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: H-1 parvovirus (ATCC® VR-356™)

### Description

**Strain:** Toolan

**Classification:** *Parvoviridae*, *Parvovirinae*, *Parvovirus*

**Original Source:** Human embryo lung (4 months operative abortion) from mother with metastatic breast cancer, who had an HAI and neutralizing titer of 1:640 to H-1 virus.

**Depositor:** HW Toolan

### Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

### Propagation

**Propagation Host:**

Chang L cells (ATCC® CCL-13™)

**Effect on Host:**

Cytopathic effects (cell death) in tissue culture; death or deformity of newborn hamster depending on virus concentration

**Growth Conditions**

**Temperature:** 37°C

**Recommendations for Infection:** Plant cells 24-48 hours in advance and infect when cultures are about 70% confluent. Remove medium and inoculate with a small volume of virus diluted to provide a MOI of about 0.1. Adsorb 1-2 hours at 37°C in a humidified 5% CO<sub>2</sub> atmosphere, rocking every 20-30 minutes to redistribute inoculum. End adsorption by adding virus growth medium.

**Incubation:** Incubate infected culture for 5 days at 37°C temperature in a humidified 5% CO<sub>2</sub> atmosphere, until CPE is progressed through 80% of the monolayer.

### Comments

Plaque purified on Salk MkHe. Hemagglutinates a variety of RBC, particularly guinea pig, hamster and human, and also has a CF antigen. Produces deformity or death in newborn hamsters and neutralizing antibodies in humans, monkeys, hamsters and rats.

Virus has been sequenced: GenBank Accession ID X01457.1

### References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

### Key Abbreviations

°C, degrees Celsius

CF, complement fixation

CO<sub>2</sub>, carbon dioxide

CPE, cytopathic effect

HAI, hemagglutination inhibition

He, heart

Mk, monkey

MOI, multiple of infection

RBC, red blood cells

### Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC

Product Sheet

# H-1 parvovirus (ATCC® VR-356™)

**Please read this FIRST**

	Storage Temp. <b>-70°C or colder</b>
.....	
	Biosafety Level <b>2</b>

**Intended Use**

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

**Citation of Strain**

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: H-1 parvovirus (ATCC® VR-356™)

lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

**Disclaimers**

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at [www.atcc.org](http://www.atcc.org)

Additional information on this culture is available on the ATCC web site at [www.atcc.org](http://www.atcc.org).
