Description

Strain: Farina [E26D]

Classification: Picornaviridae, Enterovirus, Human enterovirus B

Original Source:

Feces of child with aseptic meningitis, Massachusetts, 1950

Depositor: S Kibrick

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

human amnion cells

Host of Choice: HAm cells

Host Range: HAm, Mkk, HEK, human embryonic skin-muscle, HED cells

human amnion; monkey kidney cells; human embryonic kidney cells; human embryonic skin and muscle; human diploid embryonic cells

Effect on Host:

Yes, in vitro effects: Cytopathic effects in tissue culture

CPE

Growth Conditions

Duration: 2-4 days

Comments

CPE appears later and is less marked in Mkk than in HAm cell cultures but the titer and CPE increase on serial passage

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

CPE, cytopathic effect

HAm, human amnion

HED, human embryonic diploid cells

HEK, human embryo kidney

Mkk, monkey kidney

TC, tissue culture

TCID₅₀, median tissue culture infective dose

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the
