

Product Sheet

Human herpesvirus 5 (ATCC® VR-538™)

Please read this **FIRST**

Storage Temp.
**Liquid nitrogen
vapor phase**

Biosafety Level
2

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human herpesvirus 5 (ATCC® VR-538™)

Description

Strain: AD-169
Classification: *Herpesviridae, Cytomegalovirus*
Common Name: Human cytomegalovirus
Original Source: Adenoid tissue from 7-year-old female
Depositor: WA Chappell

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:
MRC-5 (ATCC® CCL-171™)
Effect on Host: CPE, cell enlarging, rounding, sloughing

Medium:
EMEM (ATCC® 30-2003™) + 10% FBS (ATCC® 30-2020™ or 30-2021™)

Growth Conditions

Temperature: 36°C

Recommendations for Infection: This product is produced by co-cultivation of virus with fresh host cells. Prepare a bulk cell suspension the day of inoculation. Seed culture vessels at $1.5 - 2.0 \times 10^4$ cells per cm^2 . Calculate the volume of virus needed to achieve an optimal MOI (e.g. 0.1 to 1) and then dilute virus in virus growth medium to prepare the virus inoculum. Add virus inoculum to culture vessels. Incubate for 24 hours at 36°C in a humidified 5% CO_2 atmosphere. Aspirate virus growth medium to remove any traces of DMSO and then add fresh virus growth medium to cultures. Continue incubation.

Incubation: 4 to 11 days

Comments

Stable for 6 months at -60°C in the form of glycerinated cells.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

°C, degrees Celsius
 CO_2 (CO_2), carbon dioxide
CPE, cytopathic effect
DMSO, dimethyl sulfoxide
EMEM, Eagle's Minimum Essential Medium
FBS, Fetal Bovine Serum
MOI, Multiplicity of infection

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
