## Description

**Strain:** Holland duck plague, avirulent  
**Classification:** Herpesvirus, Avian  
**Original Source:**  
Duck embryo  
**Depositor:** GA Erickson

## Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

## Propagation

**Propagation Host:**  
duck embryo fibroblasts  
**Production Host:** Duck embryo fibroblasts  
duck embryo; duck embryo fibroblasts  
**Effect on Host:**  
Yes, in vitro effects: Marked rounding of cells with greater than 60% cytolysis  
CPE, cell rounding and greater than 60% cytolysis

## Growth Conditions

**Temperature:** 37.0°C  
Duration: 2-3 days

## Comments

Dried material contains penicillin and streptomycin. For use, reconstitute to original volume of 0.5 mL.

## Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

## ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

## Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.
