Strain: Wyoming
Classification: Retrovirus, Lentivirus Group, Equine Lenvitiruses
Original Source: Blood from horse with typical equine infectious anemia disease
Depositor: W Malmquist, F Fuller

Refer to the Certificate of Analysis for batch-specific test results.

Propagation Host:
equine dermal cells (ATCC CCL-57)

Production Host:
E. Derm (ATCC® CCL-57™) horse; E. Derm cells (ATCC CCL-57)

Effect on Host:
Cytopathic effects in horse leucocyte cultures
CPE
Death or recovery as a carrier in horse

Growth Conditions
Incubation: 8-21 days

Comments
Used for preparation of equine infectious anemia diagnostic antigen. Equine dermal cells exposed to virus must be transferred more than 3 times before good yields of antigen are obtained. After infected cells lose vitality, they can be revitalized by the addition of non-infected equine dermal cells. Used for preparation of equine infectious anemia diagnostic antigen. Equine dermis cells exposed to the virus must be transferred more than 3 times before good yields of antigen are obtained. After infected cells lose vitality, they can be revitalized by the addition of non-infected equine dermis cells. Some evidence that this may be a retrovirus.

Key Abbreviations
CPE, cytopathic effect
FEK, fetal equine kidney
Pen, penicillin
Strep, streptomycin
TC, tissue culture
TCID[50], median tissue culture infective dose
USDA, United States Department of Agriculture

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty
The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media
may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org.
