

Product Sheet

## Canine adenovirus 2 (ATCC® VR-800™)

Please read this **FIRST**

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Canine adenovirus 2 (ATCC® VR-800™)

### Description

**Strain:** Toronto A 26/61

**Classification:** *Adenoviridae*, *Mastadenovirus*, Canine adenovirus A

**Original Source:** Throat swab from a dog with laryngotracheitis

**Depositor:** LN Binn, Walter Reed Army Institute of Research, Washington, DC

### Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

### Propagation

**Propagation Host:** MDCK (ATCC CCL-34)

**Effect on Host:** CPE, cell rounding and sloughing

**Medium:** EMEM (ATCC 30-2003) + 2% FBS (ATCC 30-2020)

### Growth Conditions

**Temperature:** 37°C

**Recommendations for Infection:** Plate cells 24-48 hours prior to infection and infect when cultures are 80-90% confluent. Remove medium and inoculate with a small volume of virus (e.g. 1 mL per 25 cm<sup>2</sup>) diluted to provide an optimal MOI (e.g. 0.1). Adsorb 1-2 hours at 37°C in a humidified 5% CO<sub>2</sub> atmosphere, rocking every 15-20 minutes to redistribute inoculum. End adsorption by adding virus growth medium.

**Incubation:** 3-8 days

### Comments

Partial cross-neutralization, HAI and CF with anti-infectious canine hepatitis serum. Hemagglutinates human type O RBC.

### References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

### Key Abbreviations

°C (C), degree Celsius  
CF, complement fixation  
CO<sub>2</sub> (CO2), carbon dioxide  
CPE, cytopathic effect  
EMEM, Eagles minimum essential medium  
FBS, fetal bovine serum  
HAI, hemagglutination inhibition  
MOI, multiplicity of infection  
RBC, red blood cells

### Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
