Description

Strain: Winthrop
Classification: Herpesviridae, unclassified
Original Source:
Ovarian fluid from post-spawning rainbow trout (*Salmo gairdneri*), 1975
Depositor: KE Wolf, MC Quimby, WG Taylor

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:
rainbow trout gonad (RTG-2) cells (ATCC CCL-55)
rainbow trout; RTG-2 cells (ATCC CCL-55)
Effect on Host:
Cytopathic effects (syncytium formation) in tissue culture
Death in trout

Growth Conditions

Incubation: 3-10 days at 10°C in RTG-2 cells; 30-60 days in rainbow trout

Comments

TC requires 2 hours adsorption at 10°C for maximum PFU. Incubation temperature (in vivo and in vitro) best at 10°C or lower.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

MEM, minimum essential medium (Eagle)
PFU, plaque forming units
RTG-2, rainbow trout gonadal tissue cells
TC, tissue culture

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

Product Sheet

Salmonid herpesvirus 1 (ATCC® VR-868™)

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org

Additional information on this culture is available on the ATCC web site at www.atcc.org.
