

Product Sheet

Feline syncytia-forming virus (ATCC® VR-889™)

Please read this **FIRST**

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Feline syncytia-forming virus (ATCC® VR-889™)

Description

Strain: F-17
Classification: Retrovirus, Foamy
Original Source:
Thymus cell culture of normal cat
Depositor: JL Riggs

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

feline embryo fibroblasts
feline kidney cells; human kidney cells; rat kidney cells

Effect on Host:

Foamy cytopathic effects, syncytium formation. Does not appear to be associated with any disease in animals

Growth Conditions

Incubation: 5-8 days

Comments

Produces foamy CPE; syncytia in infected cell cultures is labile, rapidly destroyed by freeze-thaw and organic solvents. Particles which bud from membranes of infected cells contain RNA-dependent DNA polymerase which exhibits greater activity with Mn²⁺ than with Mg²⁺ (Todaro et al., 2nd Lepetit Colloquium, North Holland Publ. Co., 1971, pp. 206-209).

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

CPE, cytopathic effect
CRFK, Crandell feline kidney cells
DMSO, dimethyl sulfoxide
DNA, deoxyribonucleic acid
EF, embryo fibroblasts
RNA, ribonucleic acid
TCID₅₀, median tissue culture infective dose

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.
