

## Product Sheet

# Aguacate virus (ATCC® VR-900™)

### Please read this FIRST

Storage Temp.  
**-70°C or colder**

---

Biosafety Level  
**2**

### Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

### Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Aguacate virus (ATCC® VR-900™)

### Description

**Strain:** VP 175 A  
**Classification:** Bunyaviridae, Phlebovirus  
**Common Name:** Aguacate virus  
**Original Source:** Lutzomyia (mixed species), isolated in Vero cells, Panama, 1969  
**Depositor:** RE Shope

### Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

### Propagation

**Propagation Host:**  
suckling mouse; Vero cells (ATCC CCL-81)  
**Recommended Host:** Vero (ATCC CCL-81) cells

**Effect on Host:**  
Yes, in vitro effects: cytopathic effects in tissue culture (plaques)  
CPE and plaques in TC, death in animals  
Yes, in vivo effects: death in suckling mice

**Medium:**  
Virus growth medium: L-15 + 2% FBS

### References

References and other information relating to this product are available online at [www.atcc.org](http://www.atcc.org).

### Key Abbreviations

(define all abbreviations used on master product sheet and batch product sheet)  
Vero, African green monkey kidney cells  
FBS, Fetal Bovine Serum  
sM, suckling mouse  
i.c., intracerebral  
i.p., intraperitoneal  
CPE, cytopathic effect  
TC, tissue culture  
TCID<sub>50</sub>(TCID<sub>50</sub>), The Tissue Culture Infectious Dose  
50% endpoint is the 50% infectious endpoint in cell culture. The TCID<sub>50</sub> is the dilution of virus that under the conditions of the assay can be expected to infect 50% of the culture vessels inoculated, just as a Lethal Dose 50% (LD<sub>50</sub>) is expected to kill half of the animals exposed. A reciprocal of the dilution required to yield the TCID<sub>50</sub> provides a measure of the titer (or infectivity) of a virus preparation.

### Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

### ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media
