

Product Sheet

Human adenovirus 37 (ATCC® VR-929™)

Please read this FIRST

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human adenovirus 37 (ATCC® VR-929™)

Description

Strain: GW (76-19026)

Classification: *Adenoviridae*, *Mastadenovirus*, Human adenovirus D

Original Source: Human eye with keratoconjunctivitis (possible genitourinary disorder), Netherlands, 1976

Depositor: JC de Jong, National Institute for Public Health and the Environment, Netherlands

Batch-Specific Information

Refer to the Certificate of Analysis for batch-specific test results.

Propagation

Propagation Host:

WI-38 (ATCC® CCL-75™)

Effect on Host:

CPE, refractile rounding and sloughing

Medium:

EMEM (ATCC® 30-2003) + 2% FBS (ATCC® 30-2020)

Growth Conditions

Temperature: 37°C

Recommendations for Infection: Plate cells 24 hours prior to infection and infect when cultures are 75-90% confluent. Remove medium and inoculate with a small volume of virus (e.g. 1 mL per 25 cm²) diluted to provide an optimal MOI (e.g. 0.1). Adsorb 1-2 hours at 37°C in a humidified 5% CO₂ atmosphere while rocking continuously. End adsorption by adding virus growth medium.

Incubation: Incubate infected culture for 2-11 days at 37°C in a humidified 5% CO₂ atmosphere, until CPE are well advanced through 90% of the culture.

Comments

Deposited as Adenovirus type 37. Good immunogen in rabbits and horses. Cross-reacts with Human adenovirus 10, 13, 19 and 30 by serum neutralization and HAI. HA with rat, rhesus monkey and human O type red blood cells.

References

References and other information relating to this product are available online at www.atcc.org.

Key Abbreviations

°C, degrees Celsius

CO₂ (CO2), carbon dioxide

CPE, cytopathic effect

EMEM, Eagle's Minimum Essential Medium

FBS, fetal bovine serum

HA, hemagglutination

HAI, hemagglutination inhibition

MOI, multiplicity of infection

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media

Intended Use

This product is intended for research use only. It is not intended for any animal or human therapeutic or diagnostic use.

Citation of Strain

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Human adenovirus 37 (ATCC® VR-929™)

may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans. While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org

Additional information on this culture is available on the ATCC web site at www.atcc.org.
