Description

This is a full length clone of the human papilloma virus 52 (HPV-52), linearized at the EcoRI site and cloned into the EcoRI site of the pUC19 vector.

Designation: pCD15 purified plasmid DNA

Notes

Restriction digests of the clone gave the following sizes (kb): EcoRI - 7.9, 2.7.

-ATCC Staff

Distributed In

E. coli (ATCC HB-101)

Insert Information

Insert Size (kb): 7.942

Gene: human papilloma virus 52, HPV-52

Source: human with cervical dysplasia

Insert ends: EcoRI

Genbank accession: X74481

Vector Information

Construct size (kb): 10.628

Marker: ampR

Excise insert: EcoRI

Vector: pUC19

Vector type: plasmid

Vector size (kb): 2.686

Markers: ampR

Vector ends: EcoRI

Propagation

Plasmid can be transformed into a suitable *Escherichia coli* host using standard protocols and then grown on LB + 50 µg/mL of ampicillin agar. Incubate cultures at 37°C. Isolate DNA using standard plasmid preparation procedures.

Biosafety Level: 2

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.
