NGS-Ready DNA from Staphylococcus aureus subsp. aureus, strain FDA 209 (ATCC® 6538DX™)

NGS-Ready DNA from Staphylococcus aureus subsp. aureus, strain FDA 209 (ATCC® 6538DX™)

Source: NGS-Ready DNA from Staphylococcus aureus subsp. aureus, strain FDA 209

Description: NGS-ready DNA extracted from Staphylococcus aureus subsp. aureus, strain FDA 209 [ATCC® 6538DX™].

Note: Sequence produced from this product is available through the ATCC® Genome Portal (genomes.atcc.org).

Preparation Procedure

1. Thaw the vial at room temperature and immediately place on ice. Avoid exposing the DNA to repeated freeze-thaw cycles as it may result in degradation. If the complete vial will not be used for your application, aliquoting is highly recommended to avoid multiple freeze-thaws.
2. Gently mix the sample to ensure an even distribution of material. Avoid vortex use and repeat pipetting to maintain DNA.
3. Briefly centrifuge the tube before opening to ensure all liquid is at the bottom.

Quality Control Information

1. NGS-ready DNA is provided frozen. Store at -20°C or colder. Note: Do not store in freezers with a defrost cycle. This will expose the product to increased temperatures.
2. Total DNA by PicoGreen® measurement: ≥ 10 µg
4. DNA fragment size: ≥ 20 kb
5. Functional activity confirmed by whole-genome sequencing
6. Identity confirmed by data analyses performed using ONE CODEX®.

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the Biosafety in Microbiological and Biomedical Laboratories from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

ATCC Warranty

The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

Disclaimers

This product is intended for laboratory research purposes only. It is not intended for use in humans.

While ATCC uses reasonable efforts to include accurate and up-to-date information on this product sheet, ATCC makes no warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. ATCC does not warrant that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, and use. ATCC is not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to insure authenticity and reliability of strains on deposit, ATCC is not liable for damages arising from the misidentification or misrepresentation of cultures.

Please see the enclosed Material Transfer Agreement (MTA) for further details regarding the use of this product. The MTA is also available on our Web site at www.atcc.org.

Additional information on this culture is available on the ATCC web site at www.atcc.org.
