**Source:** Candida kefyr (Beijerinck) van Uden et Buckley

**Designation:** genomic DNA from AmMS 226 (ATCC 66028)

**Description:**
High molecular weight DNA, appropriate for polymerase chain reaction (PCR)* process and other molecular biology applications.

**Batch-Specific Information**
Refer to the Certificate of Analysis for batch-specific test results.

**Quality Control Information**
1. Yeast genomic DNA is provided as dried material and shipped at room temperature.
2. Integrity of DNA was determined by electrophoresis on a 1% agarose gel stained with ethidium bromide, and was found to be intact and of high molecular weight.
3. No RNA was detected by electrophoresis.

*The polymerase chain reaction (PCR) process is covered by patents owned by Hoffmann-La Roche Inc. Use of the PCR process requires a license.

**Biosafety Level:** 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the current publication of the *Biosafety in Microbiological and Biomedical Laboratories* from the U.S. Department of Health and Human Services Centers for Disease Control and Prevention and National Institutes for Health.

**ATCC Warranty**
The viability of ATCC® products is warranted for 30 days from the date of shipment, and is valid only if the product is stored and cultured according to the information included on this product information sheet. ATCC lists the media formulation that has been found to be effective for this strain. While other, unspecified media may also produce satisfactory results, a change in media or the absence of an additive from the ATCC recommended media may affect recovery, growth and/or function of this strain. If an alternative medium formulation is used, the ATCC warranty for viability is no longer valid.

**Disclaimers**
This product is intended for laboratory research purposes only. It is not intended for any animal or human therapeutic or diagnostic use.

If use of this culture results in a scientific publication, it should be cited in that manuscript in the following manner: Candida kefyr (Beijerinck) van Uden et Buckley (ATCC® 66028D™)

DNA INFORMATION:
Weight: 25 ug (twenty-five micrograms) dried
